➤ IMPALA TERMINALS PERU

Impala Terminals facilitates the global trade of commodities by offering producers and consumers reliable and efficient access to international markets.

We design, implement, own and operate multimodal logistics assets, with a focus on the safe and reliable transfer of dry and liquid bulk cargoes and containers to and from inland sites of production and consumption, through deep-sea ports for onward distribution to end users.

Impala Terminals has particular expertise in providing efficient logistics solutions in challenging environments and hard to reach locations.

With 28 operations across 20 countries around the world, we are strengthening trading links every day by offering smart, cost-effective and customer-focused solutions that are built on our years of expertise in fast-growing markets.

ABOUT IMPALA TERMINALS CALLAO

Impala Terminals has rapidly established its Callao operation as a leader in Latin America. Producers and traders can benefit from specialised logistics services in receiving, storing, handling copper, lead and zinc concentrates, refined metals, project cargo as well as laboratory testing facilities.

Since 2011 Impala Terminals has invested over USD180 million in building the largest and most modern export facility for the mining sector in Peru. Located less than two kilometres

from the city's port, Impala Terminals Callao is the world's largest roofed mineral export terminal with over 175,000m² of covered warehousing capacity with direct rail and truck access as well as a conveyor belt connection to a dedicated deep-sea concentrates loading berth.

The Callao facility caters for over half of the port's mineral exports and has an overall annual throughput capacity of 2.8 million metric tonnes, receiving up to 200 trucks and 100 wagons of mineral concentrates per day.

Impala Terminals Callao also provides import and export facilities, including customs clearance services from our bonded area of the warehouse, for containers and general cargoes.

The bonded facility provides a unique opportunity for importers and exporters of containerised goods to efficiently arrange the logistics process, and optimise the cost and time required to clear and transport the goods. In 2018 we exported over 25,000 containers from Callao to international markets.

➤ END-TO-END SERVICE

In Peru, we are bringing concentrates from over 150 small, medium and large mines in the Andes to international markets, adding value for our customers at each stage of the supply chain.

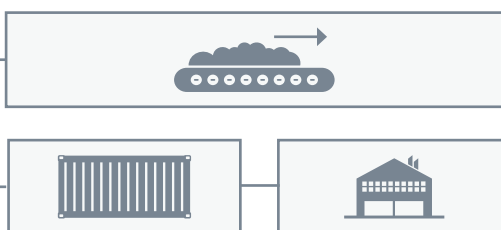

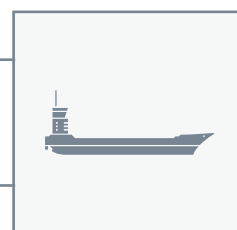

BLENDED ➤

LABORATORY ➤

LOADING ➤

SHIPPING ➤

Impala Terminals Callao blends multiple deliveries to meet the specification and quantities required by our global customers.

Quality blends and special custom tests are performed in our on-site laboratory, providing customers with immediate access to results, without costly delays of the use of other offsite facilities.

Blended bulk concentrate is transferred via a three kilometre conveyor belt to a berthed vessel at Callao's deepwater port.

BONDED WAREHOUSE ➤

Concentrates can also be loaded into containers and moved into our on-site bonded warehouse that enables us to facilitate the clearance process of incoming or outgoing cargoes.

Impala Terminals offers shipment and freight services including multiple dispatch options and post-fixture operations, providing our customers with immediate access to domestic and international markets.

➤ HEALTH, SAFETY, ENVIRONMENT & COMMUNITY

Protecting the wellbeing of our employees, suppliers, contractors, partners and the communities within which we operate is of fundamental importance to Impala Terminals. We identify any hazards, risks and unsafe behaviours and implement controls to ensure that these risks are minimised to the lowest level practicable. We aim to minimise any adverse impacts from our business operations on the natural environment.

The rooftop of our Callao warehouse is completely UV protected and resistant to earthquakes. We regularly control and measure air, water and soil particle emissions to ensure that protection extends from both inside to outside the walls of our facility. Our Callao facility has a number of ISO accreditations and has received numerous awards for our high safety, security and environmental management standards.

We strive to promote closer links with communities where we operate. Impala Terminals Callao is a key economic contributor to the region and conducts or collaborates on a number of programmes focused on education, entrepreneurship and nutrition within the local community.
